

# Armadillo

**Coloring Instructions:** Color the entire animal light gray. Add some pink shading to the ears and nose. Make the toenails very dark gray.

**Interesting Fact:** An armadillo can hold its breath for 6 minutes. This helps it in two ways. First, it prevents the armadillo from breathing in dirt when it is digging for food or digging a burrow to live in. Second, it helps the armadillo cross water bodies by allowing it to hold its breath while floating across the top of a creek or walking along the creek bottom under the water's surface.
