

# Black Bear

**Coloring Instructions:** Black bears can be black or cinnamon brown. If you want this to be a truly black bear, color its cheeks brown and the rest black. If you want this to be a cinnamon-colored black bear, color a white up-and-down stripe on its chest. The whole rest of the bear is brown, even its nose!

**Interesting Fact:** While black bears will eat bugs and fish, most of their food comes from plants, including berries, leaves, and tree bark. They'll also eat trash, so clean up your camp sites and pack your food in airtight containers!
