

Brown Bat

Coloring Instructions: Color the wings, legs, arms, feet, ears, and face very dark brown, almost black. Color the rest of the bat light brown.

Interesting Fact: The Big Brown Bat is the largest bat in Florida. It is only 5 inches long and weighs as much as 10 dimes. It is also the fastest at 40 mph. These bats can eat up to 3000 insects a night! Their wings are made up of really long fingers with thin, furless skin stretched tight in between each finger. Their bodies are furry, and they feed their babies milk while hanging upside down! Bats are the only mammals that can truly fly. (Flying squirrels just glide.)
