

# Marsh Rabbit

**Coloring Instructions:** Color the belly, chest, chin, and under the nose white. The insides of the ears are light pink. The rest of the rabbit is light brown.

**Interesting Fact:** Marsh rabbits have small tails and short ears, giving them a very different appearance than the long-eared, fluffy-tailed Eastern Cottontail rabbit many people are familiar with. Marsh rabbits live in wetland areas. They can swim and stand up on their back legs to see over the tall marsh grasses.
