

# Red Rat Snake

**Coloring Instructions:** Color all of the blotches on the top of the rat snake brownish-orange. Color the areas around the blotches maize yellow. Color the eyes black. On the snake's underside, color the small scales different colors, including orange, yellow, and red.

**Interesting Fact:** Rat snakes are also called Corn Snakes, because their multi-colored belly looks like the multicolored dried corn available in stores at Thanksgiving. They are good climbers, and will slither into trees, barns, and fences looking for mice, rats, birds, and bats to eat.
